### ZEN School of SHIATSU

Kris Deva North, Master of the Zen School has been involved in healing meditation since 1972. After training in UK, Japan, Thailand and USA, in 1993 he co-founded the Zen School of Shiatsu. Kris integrates Shamanic, Tantric and Taoist traditions of the "short path" from his experiences living with Kali-worshippers of Nepal; travelling with a Thai Buddhist monk; satsang with Shiva Saddhus in the Himalaya, Shamans of Africa, North America and Hawaii, and Aboriginal men of high degree in Australia; darshan with the Dalai Lama; witnessing last rites in Varanasi and puja with the Brahmins of Pushkar; and practising taoist, tantric and shamanic meditations and teachings on death, life and beyond, in jungle, mountains, city, beach and desert. He has qualified as an NLP Practitioner with Paul McKenna and John La Valle, Chi Nei Tsang and Cosmic Healing with Mantak Chia. Kris has appeared several times on national TV in programmes such as Emma Freud's series on Sex and Religion, Nick Hancock's Sex and Stopping - History of Contraception, and Carlton TV City Survial Guide. In 2005 Channel 4 screened an observational documentary on his teaching Taoist practices to a group of celebrities on a remote island in Thailand. With the Taoist Master Mantak Chia Kris co-authored the forthcoming "Shiatsu Secrets for Lovers" (working title). In addition to his ongoing work at the Zen School he has taught in Australia, Ireland, Spain and USA.

### Michael Cullingworth, Master of the Zen School

After a life of searching through several degrees and other nonsense, I found my way in 1985 through studying massage, Postural Integration and at last Shiatsu. I have now been studying, practising and teaching Shiatsu since 1986, especially Zen Shiatsu, which I learned from Nigel Dawes and Veronica Howard. In recent years my main source of inspiration has been in Japan with Master Ryokyu Endo, a pupil of the late Father of Zen Shiatsu Shizuto Masunaga. As well as shiatsu, I am a practitioner of Chi Nei Tsang, I run yoga holidays in Turkey and I am closely involved in running the New Cross Natural Therapy Centre, London SE14. There are loads of other people I should honour and other activities that could be interesting, but this is probably already more than

### Bernadette Carelse, Teacher of the Zen School

I became interested in working with energy (Chi/Prana) during Tai Chi classes in Zimbabwe, nearly 10 years ago. I was also learning Yoga at the time. Then I found the Zen School of Shiatsu and decided to learn the art of gentle healing - Zen Shiatsu. Now I'm a qualified practitioner and happy to be one of the tutors at the Zen School of Shiatsu. I also teach Integral Yoga - after training with the British Wheel of Yoga. Other therapies I practise are Holistic Massage, Aromatherapy (ITEC), Reflexology (ITEC), Reiki, Chi Nei Tsang - a Taoist Chi Massage that detoxifies and rejuvenates the internal organs - and Cosmic Healing (Chi Gong Colour Therapy.) I enjoy seeing other people feel better, look happier - more relaxed, centred, together and in touch with themselves.

### Doug Foot, Teacher of the Zen School

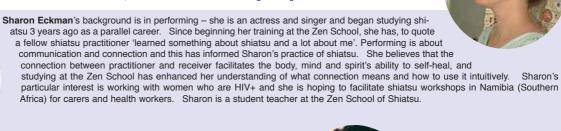

I am an experienced tactile therapist with over 12 years experience in giving massage, reflexology, shiatsu and more recently acupuncture treatments. Why did I become a therapist? Like many therapists, I experienced a period of physical and emotional trauma, which eventually forced me to take control of my own healing process. During the early 1990's I was diagnosed with severe Irritable Bowel Syndrome (IBS). I decided to make a number of life changes including resigning my job as General Manager of a small video production and training company. Under the supervision of my General Practitioner, I used both allopathic and complementary medicine to regain my health. I was fortunate to receive many tactile therapies including holistic massage and shiatsu. I also undertook acupuncture and Chinese dietary therapy which I think was instrumental in turning around my ill health. I also chose to retrain as a therapist and embark on a process to help other people to more actively engage in healing themselves. My early experiences of managing my own health imbalances have provided grounding in reflecting on what we mean by "good health". Good health can mean what we want it to mean - it really is up to ourselves to create a reality relevant to our own situation.

Elizabeth Butters Liz first studied shiatsu in 1988. However it was ten years before she decided to take it up professionally and became a student at the Zen School. She has since developed her practice with Carola Beresford-Cooke in Wales and Ohashi (pupil of Masunaga, father of Zen Shiatsu). She is now a student teacher at the Zen School and represents the School on the General Shiatsu Council. Liz is also an NLP practitioner. She finds both shiatsu and NLP can facilitate change and self healing on all levels: mind, body and spirit. She is particularly interested in working with women with gynaecological problems and people with cancer. Liz has a background in health services research, primarily in the fields of palliative and terminal care, evaluating services for people with cancer and HIV. She was a member of the Management Committee of Women's Health for five years. Women's Health is a national charity which provides information and support to enable women to make informed decisions about their gynaecological health. Liz is keen to integrate her skills and to carry out research into complementary therapies. In her spare time Liz practices Qi Gong, Okido yoga and Taoist meditation. She continues to explore other therapies including Qi Gong Healing and Chi Nei Tsang. A keen amateur trumpet player she plays in a big band. Liz offers shiatsu and NLP in north west London and at the Zen School of Shiatsu.

Megan Stuart has a background of music, performing, theatre, healing and many years of teaching and working with children. She has a long-standing interest in and experience of many complementary therapies, and brings all her experiences into giving shiatsu treatments with sensitivity and depth. Having discovered the Zen School of Shiatsu 6 years ago, she finds that working with people to facilitate their self-healing on all levels - physical, emotional, mental and spiritual - enhances her own sense of vitality, groundedness and well-being. She has particular experience and understanding of working with children and pregnant women - shiatsu can be safely received throughout pregnancy as a relaxing and nurturing experience for both mother and baby. Megan is a student teacher at the Zen School of Shiatsu, and has studied Taoist Qi Gong healing with Master Mantak Chia.

Having commuted from Italy throughout his training, Philip Smith has joined the Zen School teacher-training programme. He practices Taoist meditation and is qualified in Healing (QiGong Cosmic Therapy)

Jaclyn Snyders has joined the Zen School teacher-training programme. She practices Taoist meditation, and Cosmic Healing (QiGong Therapy), and co-facilitates the Jade Circle - Taoist Meditation for Women.

### WHAT...IS SHIATSU.....?

What is Shiatsu? Shiatsu is a hands-on therapy to harmonise the flow of energy throughout the entire being: mind, body and spirit. Running water does not stagnate - the same with your energy. When it flows, you feel good. When blocked, you might feel ill, or at least uneasy in yourself, out of sorts. What are the benefits? Participants generally feel better following a treatment....what more could you want? With experience you can learn to help relieve symptoms of stress-induced and other common ailments such as headneck- or back-ache, insomnia, constipation, menstrual pain and many chronic conditions resistant to orthodox treatment. What you can expect to be known best for is generating in your participant a most wonderful sense of well-being. This feeling reflects in you. Why Zen Shiatsu? Shiatsu styles range from the mechanical to the mystical. A gentle, noninvasive yet powerful therapy, the Tao of Zen Shiatsu emphasises work on the whole being, the importance of intention and projection of your loving-kindness, development of your sensitivity from the very beginning, and helping participants access their own special self-healing power.

### **HOW CAN WE HELP YOU?**

We offer you a flexible study programme to suit your own requirements. Choose from low-cost afternoon, evening, weekend or intensive (full-time) training. Combine with more advanced coursesto save yourself time and money

Do you like to learn by gradual absorption? or by sudden immersion?

If you prefer to "stroll the path, supremely at leisure?"... then the Regular (weekly or monthly) Certificate Course may show the way for you.

Or are you intense, and like to "race ahead as if your hair were on fire?" - then jump-start training with our Special 5-day Intensive Certificate Course, Monday to Friday, 10am to 5pm, continuous learning (with lunch-breaks, of course).

### **CAREER DEVELOPMENT**

By the end of your formal training we aim to see you pass the professional assessment with ease and be a happy and confident practitioner, capable of setting up and running your own practice, making a living by doing what you love. Our referral service helps you build your practice, and we publicise student and practitioner treatments at the Festivals of Mind-Body-Spirit, WellBeing Show, local exhibitions, corporate and community events, and the internet.

### HELPING OTHERS

Do you remember that lovely warm feeling **you** got last time you helped someone? The look of appreciation on their face, their expressions of gratitude? Didn't that just add a whole new dimension to your life, giving you something to look back on and say to yourself, **just in that moment I felt truly wonderful**? Helping others is a way of enriching life, of satisfying our own energy-needs. You don't have to be a saint: for example Mother Teresa, Mahatma Gandhi and many others who wrote of the satisfaction of giving service were simply helping themselves to fulfilment in their own way. Now we aren't suggesting you go off to work in a street-clinic in Calcutta, but we would love to show you how you can get that lovely warm feeling of satisfaction back again whenever you like and help yourself to stress relief, meet new people, learn a caring skill, put your compassion to work, possibly change your life... or simply help family and friends learn to relax, as you relieve symptoms of common ailments, induce a most wonderful sense of well-being... and perhaps find balance in your own life. **Is this what you might be looking for?** 

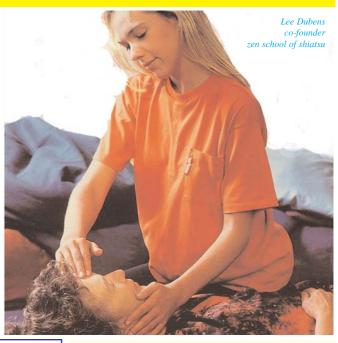

### THE ZEN SCHOOL OF SHIATSU

LEARN THE ROPES - start anytime! Learn how to move around, how to give a great shiatsu treatment, to protect yourself from needless backpain, or energy depletion and contamination; to develop sensitivity; learn what conditions are best left alone until you have more experience, and which ones are contra-indicated anyway.

Learn the art of gentle healing. Learn something about yourself, too, and of the gift Nature has given you for this work.

**TAOIST TRAINING** Step 1 is included in the Shiatsu Practitioner Course, to enhance your healing-power and energy-management. See pages 14/15 for programme and information.

Anyone setting out on a learning path has to consider their resources of time and money. Its a good idea to think about your preferences, too.

### Ask yourself:

Are you a person who likes learning by total immersion? or steady absorption? Do you want to jump-start your training with an Intensive, or soak it up gently by the month or the week?

For your further training, have you the time and capacity to fast-track, combining courses, or will you steadily forge ahead, step by step?
